- 1-Mile Incremental Buffer
- Town Boundary
- Hydrology
- Vermont Protected Lands
- Hub - Visibility within Non-Forested Areas
- Top 10 Meters - Visibility within Non-Forested Areas

**DRAFT**

GIS viewshed mapping is a preliminary means of visual analysis. While beneficial for preliminary orientation and investigation, because of data assumptions and omissions, viewshed maps are not a definitive indication of visibility. Potential visibility needs to be confirmed through field investigation and other visualization techniques.

Elevation and obstruction data derived from LiDAR data, aerial imagery, the National Elevation Dataset and the National Land Cover Database.
